EDUCATION

Claremont McKenna College – Claremont, CA

Sept 2026

Major: Data Science

- GPA: 3.2
- Relevant Coursework: Computing for the Web [A], Data Structures and Algorithms [A], Linear Algebra [A-], Data Mining [A], Foundations of Data Science [A-], Big Data [A]
- Florida International University (high school dual-enrollment): Programming 1 [A], Discrete Structures [A]

EXPERIENCE

Nocturne

Feb 2026 - Present

AI Engineer (Contract)

- Built a self-hosted agent platform (kanban + MCP server + Playwright QA harness) that turns codebase audits into triaged tickets AI coding agents implement, test, and ship as reviewed PRs
- Designed autonomous overnight workflows where agents diagnose tickets against the live database, run adversarial cross-model code review, apply migrations, test, and open draft PRs for human review
- Automated regression QA with Playwright agents that walk venue and contractor critical paths (payments, invoices, onboarding) and auto-file deduplicated, screenshot-embedded bug tickets
- Shipped 175+ production commits through this agent-assisted workflow, including Stripe Connect payment flows, a 33-52% dashboard speedup, and a clause-based e-signature contract system

Lavner Education

May 2025 - Aug 2025

Stem instructor / program director

- Delivered engaging lessons in Python, robotics, and fintech literacy to 100+ adolescents, increasing student project completion rates, boosting STEM engagement scores by 20%.

FastText Research

Jan 2023 - Dec 2025

AI/ML Research Assistant

- Developed test suite for nearest neighbor model that transforms input word vectors into new languages using Meta's FastText library in python
- Developing 2nd order gradient descent for the library's alignment script to accelerate time to optimization

Balloon Technologies (startup marketplace for local services)

May 2023 - Aug 2023

Software Engineering Intern

- Implemented a UI that is dynamically generated from an LLM's streamed response
- Built out the primary backend using AWS DynamoDB, AppSync, and Lambda functions
- Generated user recommendations using embeddings on text-based data

PROJECTS

PageRank Search Engine

- Implemented PageRank from scratch via power iteration in NumPy over a real web-link graph built from the Lawfare national-security corpus
- Combined link-authority scores with query relevance to rank results in a working search engine; 8 stars on GitHub

MetricPath

- Built an AI health CLI where a 19-question conversational LLM intake feeds a logistic mortality-risk model trained on public NHANES data, returning a risk score and population percentile
- Generates a personalized lifestyle report and daily schedule; supports Anthropic, OpenAI, or fully local Ollama backends with a privacy-first, nothing-retained design

Personal Portfolio

- Developed a Next.js + TypeScript portfolio as a faithful clone of the GitHub profile UI with 20+ interactive features
- Implemented a click-to-move chess engine, a contribution graph that renders typed text, an AI resume chatbot, a command palette, and light/dark theming

13th Care

- Designed and shipped a responsive, athlete-first marketing site for a sports-care startup as a freelance client project
- Deployed live on Vercel with security headers and scroll-reveal animations

LEADERSHIP

Civility, Access, Resources, and Expression Center at Claremont McKenna

Aug 2022 - Dec 2024

Fellow

- Plan events to increase inclusivity for students of all social identities on campus
- Manage partnerships between affinity groups on campus and facilitate collaborations

SKILLS & CERTIFICATIONS

- Technical: Python, SQL, R, JavaScript, TypeScript, React, Next.js, Java, DynamoDB, Supabase/PostgreSQL, Docker, AWS, Stripe
- Certifications: Claude Code 101 & AI Fluency (Anthropic, 2026); Technical Interview Prep (CodePath, 2025)
